

USE CASE

Here are some of the sample inputs we have hard coded into the website for **RECOMMENDATION**, **Prediction** and **Classification**. You can choose them accordingly from the drop down provided in the website. Ideally it would have been better if all the possible values are provided in the options for the user to choose from. But for that we need to access SQL server to Azure. But since the free version doesn't support it we ended up in hard coding few sample values into the website

PREDICTION AND CLASSIFICATION

| <u>PRODUCT ID</u> | <u>PRODUCT NAME</u> | <u>COUNTRY</u> | <u>YEAR</u> | <u>MONTH</u> |
|--------------------------|------------------------------------|-----------------------|--------------------|---------------------|
| 22138 | BAKING_SET_9_PIECE_RETROSPOT | UNITED_KINGDOM | 2010 | December |
| 85123A | WHITE_HANGING_HEART_T-LIGHT HOLDER | UNITED_KINGDOM | 2010 | December |
| 37479P | CUBIC_MUG_FLOCK_PINK_ON_BROWN | UNITED_KINGDOM | 2010 | December |
| 23110 | PARISIENNE_KEY_CABINET | UNITED_KINGDOM | 2011 | May |
